

Himanshu Kesarwani

Data Analyst II

+919559860358 ✉ kesarhimanshu1996@gmail.com

Having experience of **2.5 years in Data Analysis**. Proficient in SQL, Python, Data Visualization, Data Warehouse and Cloud platforms like Azure & AWS.

Professional Projects:

1. **Business Analysis for an app based B2B MSME Client.**

Domain: E-commerce

Tech-Stack: Blob Storage, SQL Server, PowerBi.

Task:

- To determine the set of target customer, which are most likely to adopt new products.
- To identify occasional buying customers to convert them into habitual buying customers.

Actions:

- Performed **Cohort Analysis** on previous sales data resulted in determining set of customers most likely to adopt new product.
- Performed **RFM Analysis** for categorization of customers into High-Value, Regular, New, Occasional, At-risk and Churn Customers.
- Recommended strategy like giving discounts to occasional customer on previously purchased product categories.
- Published report with drawn insights.

2. **To perform Credit Risk Analysis for an NBFC Client**

Domain: Finance

Tech-Stack: Azure Blob Storage, Azure SDK for Python, Jupyter Notebook.

Task: To determine Credit Risk associated with the customers and develop a trend for the category.

Actions:

- Load data using SDK from data warehouse.
- Performed Data Cleaning, feature selection on defined KPIs of **Credit Risk Metrics** like Debt-to-Income ratio, Loan-to-Income ratio, and Credit Utilization ratio.
- Performed **EDA**, established benchmark and flagged categories as **high risk, moderate risk, potential risk & safe** and plotted various charts using matplotlib and seaborn.
- Reported analyzed trend on KPI performance.

Personal Projects:

1. Data Analysis: SQL Projects & Python EDA Projects

- <https://github.com/HimanshuKesarwani/Python-EDA-projects>

2. ETL Projects:

- <https://github.com/HimanshuKesarwani/ETL-PROJECTS>

Work Experience:

Innovation Technologies, Pune

Data Analyst II

Jan 24- Current

Data Analyst I

Feb 23- Dec 23

- Performed **MIS** operations, creating procedures, view, triggers to cater client requirements.
- Performed **Data extraction** from sources like Google Cloud Storage, Blob storage, SFDC etc.
- Performed Data Cleaning & **EDA (univariate, bivariate and multivariate analysis)** deriving insights.
- Performed data **modeling** and **normalization** leading to **15% reduction in data redundancies**.
- Conducted **Trend Analysis**, achieving an **87% accuracy rate** in sales prediction.
- Involved in **A/B testing Project** where team achieved **27% improvement in click-through rates**.

Skills & Tools:

- **SQL**- PostgreSQL, SQL Server.
- **Excel**- VLOOKUP, HLOOKUP, Pivot.
- **Python**- Pandas, NumPy, Matplotlib, Seaborn.
- **Visualization**- PowerBi, Looker Studio, Excel.
- **Data Warehouse**: S3 Bucket, Azure Blob
- **Clouds**- Azure, GCP and AWS.
- **SDLC**: Agile Methodology- Jira
- **Version Control System**- Git (GitHub)
- **Unix**- Shell Scripting

Education:

3. Bachelor of Tech.(CSE) July 15- May 19
From Jaypee Institute of Information Technology
